

“There is hope, even when your brain tells you there isn't.”

- Why am I different than others, why do I think differently?
- Why do I struggle to communicate with others?
- How can I better understand those I relate to on a daily basis?
- How can I, as a parent, understand and resolve conflict with my children?
- How do I know my study style and subject choices?
- How can I make informed career choices?
- How do I resolve conflicts in personal and professional life?
- How do I make the best possible choice when I want to pursue a new career?
- How do I improve the level of creativity and leadership in my business?
- How do I select the best-suited employees for new positions in my company?
- How can I develop effective teams?
- How do I retain valuable employees?
- How do I develop the whole-brain mental edge in my sport?
- How do I become a better coach?
- How do I become a better teacher that guides my student correctly according to their thought patterns?

❖ **Take note:** If you have asked any of these questions before and don't know how to achieve your goal, we can be of assistance.

We use The Neethling Brain Instruments (NBI®) as a revolutionary battery of instruments that strives to develop whole-brain thinking in individuals. These assessment tools will help you develop strategies to sustain creativity and positive thinking in your personal and professional life. You will also be able to identify the essence of your problems and apply creative solutions.

✚ What will I benefit from completing my NBI® Profile?

The NBI® gives an indication of how you:

- Communicate,
- Act towards other people or in certain situations,
- Do business,
- Learn,
- Teach,
- Manage in a certain career,
- Solve problems,
- Make decisions.

✚ By completing your NBI® Profile, you enable yourself to:

- Develop effective teams.
- Resolve conflicts in your personal and professional life.
- Receive the best guidance in choosing a new career.
- Improve the level of creativity and leadership in your business.
- Select the best-suited employees for new positions.
- Retain valuable employees.
- Choose the best course of study.
- Develop the whole-brain mental edge in your sport.

How does NBI® work?

- The NBI® is a 30-question diagnostic survey that indicates your personal thinking preferences. Your thinking preferences influence the way you communicate, make decisions, solve problems and manage those around you. Understanding your thinking preferences can give you a new perspective on yourself and those you interact with every day.
- They are making a choice around their thinking preferences, as they are Every response that participants choose is current, relevant and topical. Today!
- For over a century, researchers have focused on gaining deeper insight into the functioning of the four quadrant brain. Although the concept 'whole-brain thinking' is in itself a major innovation with diverse applications, it is only the tip of the iceberg.
- With the four quadrants as the basis, we are proud to introduce the 8 Dimensions Instrument, which identifies two dimensions within each of the four quadrants. The 8 dimensions are a revolutionary aspect of the NBI® as they provide greater insight into elements within each of the four quadrants. This allows for a more thorough interpretation of an individual's thinking preferences.

What will I get once I complete the survey?

After completing the survey, you will receive:

- A full-colour profile of your personal thinking preferences.
- An in-depth description of your profile and scores.
- An interpretation of the implications that your results have on your life in both a personal and professional sense.
- We do In-person or Online Consultations.
- Optional: We are also a Qualified Ordained Pastoral Team that can Minister to your Spiritual Needs.

1. But what exactly are NBI profiles?

The Neethling Brain Instruments (NBI®) are a set of revolutionary online questionnaires that aim to help individuals understand their thinking preferences, creatively implement strengths and develop whole-brain thinking strategies.

These questionnaires were developed by South African, Dr. Kobus Neethling, after 30 years of extensive international research on left and right brain thinking under the guidance of Professor Paul Torrance (University of Georgia).

2. What is NBI brain profile?

The Neethling Brain Instruments™ (NBI) are a suite of neuroscience-based assessments that provide insights into thinking preferences. Understanding your thinking preferences, as well as the thinking preferences of others, can have profound implications for personal effectiveness in a number of areas.

3. What is the NBI brain instrument?

The Neethling Brain Instrument (NBI) breaks the brain into four quadrants, each with different thinking traits, then uses your responses to develop a thinking preference profile. Renowned psychologist Kobus Neethling realized that different personality types could be sorted based on right and left brain traits.

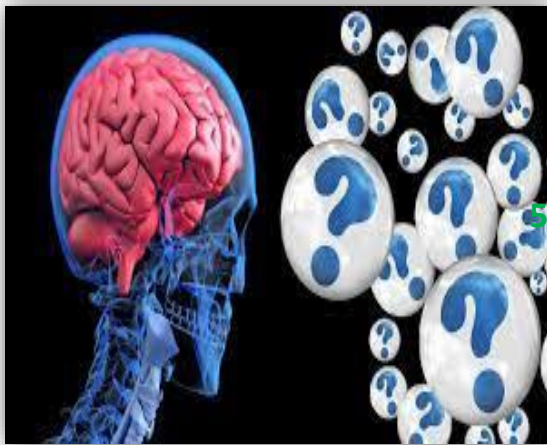

4. What does the Neethling brain instrument measure?

The NBI Individual Profile Tool is for HR Managers, people leaders and individuals to measure thinking preferences, skill gaps and leadership style. The tool helps people develop self awareness and better relationships with other.

5. Career Guidance?

NBI Brain profiles provide an objective and in depth model of thinking preferences that form the basis of making career choices. Get access to your Brain profile, Job comparison reports and discuss your future vision, dreams and passions with a qualified NBI practitioner as guide.

At the heart of NBI Brain Profiling **lies the desire to understand and grow**. When we know how we inherently think, **we are better able to relate, lead, communicate and make decisions, giving us a new perspective into not only ourselves but also into those we interact with every day.**
